The summer season is upon us again and we will, as always, be present at two of the South West's premier shows – the Axe Vale show (celebrating their 25th anniversary) on 22nd & 23rd June and the Melplash Show on 22nd August. Pop along and meet our friendly team who will be on hand to provide you with advice and information on all the services we offer.

In this season's newsletter we focus on boiler servicing and the importance of using a qualified engineer. Although thinking about the central heating isn't generally a priority in the summer, it is the ideal time to get your boiler serviced. When the first cold snap hits, the boiler breakdown calls start coming in, meaning you may have to wait a little longer to get your central heating and hot water back up and running.

What is a boiler service and why is it so important?

Regular boiler checks and maintenance will keep your central heating system running safely, smoothly and efficiently and, in turn, minimise the risk of any problems including carbon monoxide poisoning.

If you're a landlord, you are required by law to have annual gas safety checks carried out on all gas appliances in your properties.

When we attend to service boilers for the first time, customers often comment that our service is a lot more comprehensive than they have previously encountered by other companies.

Our boiler service includes –

- Cleaning of your boiler appliance
- Gas installation pipes check
- An emissions check to find out if the boiler is leaking any dangerous gases
- Assessment of flue flow (if appropriate) to ensure the boiler is ventilated properly
- Ventilation check
- A visual inspection for leaks, rust and corrosion
- A control check to ensure the boiler's controls work properly
- A pressure check, to ensure the water and gas pressure of the boiler is as it should be
- Checking the pipework of the boiler, to determine if it meets recommended safety standards
- Checking of the overall boiler installation, to ensure the appliance was installed in a safe manner
- Emptying and cleaning out your central heating filter (if you have one installed)

We also offer –

- Oil boiler servicing & repairs
- Aga & Rayburn servicing
- Servicing for additional appliances (gas fires, cookers etc.)
- Gas safety inspection certificates for landlords

Our highly-skilled team of engineers are fully qualified and registered with the appropriate governing body – Gas Safe (for gas appliances) and OFTEC (for oil fuelled appliances).

Once you are added to our servicing database, we will send you a reminder when your next boiler service is due.

Combating illegal gas work

You may have seen the recent Gas Safe spring campaign reminding consumers of the risks of illegal gas work and the importance of always using Gas Safe registered engineers.

The latest research findings by the Government's official gas registration body show that 33% of UK adults admit they haven't checked if the person carrying out their gas work is registered.

A high percentage of illegal gas work investigated in recent years was found to be unsafe, meaning the people living in the properties were in potential danger from faulty gas work.

Don't cut corners!

Gas Safe Register is the only official register for legally qualified engineers. Alarming, respondents to the research thought they'd correctly verified that their gas engineer was on the Gas Safe Register by noticing a logo on the engineer's website or uniform, or by asking the engineer.

You can find Guy Crabb Plumbing and Heating on the Gas Safe website by following this link –

<https://www.gassaferegister.co.uk/find-an-engineer/>

Scroll down to 'Check a Business' and type 'Guy Crabb' in to the business name box to identify our engineers and check their qualifications.

See what our customers have been saying about us –

“Thrilled with the boiler and glad the gas fire has been conscientiously overhauled” ~ Mrs B, Bridport - June 2019

“Just a big thank you for the work you have done for us, excellent service, the heating is better than it has ever been” ~ Mr C, Broadoak - April 2019
