AGA
STOVES

Whilst we enjoy the last of the summer days and start to feel the early chill of autumn, thoughts of cosy nights in on a winter evening start to creep in. There is nothing quite like the atmosphere created by the flicker of a real flame to make the house a home.

We're here to help brighten those dreary days – pop into the showroom and see our wide range of contemporary and traditional wood burning and multi-fuel stoves!

Contura

CLEARVIEW
STOVES

Guy Crabb Plumbing and Heating are suppliers and installers of exceptional wood burning and multi-fuel stoves for your home. Our experienced HETAS engineers can guide you through every step of the process – from the selection of a stove to suit your needs through to successful installation and finishing to the highest standard. We have selected the best stoves on the market for you to choose from. Come into the showroom and we can help you find the best option to suit you.

Why choose to have a stove?

Perhaps you are looking to replace a traditional open fireplace with an inset stove or freestanding stove, our team of craftsmen can change your fireplace entirely if required. A stove exudes a certain charm and will soon become a focal point, adding character and style to the living space.

One of the most desirable features and benefits of a wood burning or multi-fuel stove is the heat output it provides. It will provide a powerful heat source for your home, warming up the room quickly and effectively.

When it's cold and miserable outside, many of us just want to get snug in our own home. With its combination of heat and the visual impact of roaring flames, a wood burning or multi-fuel stove is a great way to bring a cosy ambience into your home.

Selecting a stove requires an analysis of the size of the room you are trying to heat, a consideration of the safest position of a stove and suitability of your chimney or room to take a new flue if none is currently present. We can generally work around any issues for installation and our experienced team, led by Charlie Slocombe, have decades of experience to draw upon. Come and visit us in the showroom or ring and book an appointment for our HETAS engineer to visit you at home to assess your requirements and provide you with options and a free quote.

** NEW IN STOCK **

As an alternative to traditional logs, we now have an exciting range of briquettes to burn in your wood burning stove. Pop in and treat yourself to a different woodburning experience.

WINE LOGS ~ Beat the winter blues with the warming aroma of wine! Wine logs are literally that – dark maroon logs formed from extracted grape seeds. They are a great talking point and help to create that ambient winter feel.

COFFEE LOGS ~ Coffee logs are the amazing new biofuel made from recycled coffee grounds. They are perfect for heating your home while helping the environment too.

PEAT BRIQUETTES ~ Peat briquettes are suitable for open fires and stoves. Peat has very little smoke and a wonderful aroma when burnt.

WHAT IS HETAS?

HETAS is the official body recognised by the government to approve biomass and solid fuel domestic heating appliance installers. This includes installing and servicing wood burning stoves.

WHY USE A HETAS REGISTERED INSTALLER?

Peace of mind –

HETAS registered installers are trained and assessed as competent, so you can have faith in their work.

It saves you time –

HETAS registered installers can self-certificate their work which means that you can avoid the need for time consuming and expensive building notice applications to the local authority.

It is simpler –

A Certificate of Compliance will be issued as a record of the job and that it complies with Building Regulations. A copy of the certificate is forwarded to HETAS who notify the local authority on your behalf.

Future proof –

If you are looking to sell your house, any new purchasers will require a HETAS installation certificate of compliance to state your stove has been safely installed.

See what our customers have been saying about us –

“Thank you for the excellent installation of our new Clearview woodburning stove, the finish and quality of your workmanship was superb” ~ Mr & Mrs Harris

“Thank you for a great job in such a short time. Your team were first class. We are as warm as your showroom now!” ~ Mr & Mrs Marks
